

MCD 411: B.Tech. Project (First Semester 2019-20)

Weekly Progress Report (From: 31/08/2019 To: 06/09/2019)

I undertake that the following work has been accomplished during the above mentioned period of one week:

- We have started incorporating multiple force fields in our model.
- Experimented with parameters and constant velocity vs constant force approaches
- We have studied the material properties of human tissue
